PROFILE

Passionate Full Stack Developer with a strong analytical and creative approach to complex technical challenges. Versatile and autonomous, I work across both frontend and backend, adapting quickly to different business contexts and technologies. Experienced in .NET development, Sage ERP applications, and electronic invoicing gateway integration.

PROFESSIONAL EXPERIENCE

Full Stack Developer

Jan. 2024 – Present

APBS Groupe – Sage ERP Solutions Integrator – Sfax, Tunisia

- Web development in .NET within the Sage ecosystem: design and development of business management applications (sales, stock, accounting, production).
- Implementation and integration of an electronic invoicing gateway compliant with current standards, connected to TTN (Tunisia TradeNet).
- Participation in all stages of the development cycle: functional analysis, architecture, organic design, programming, and testing.
- Design and development of interactive, ergonomic user interfaces using Vue.js and PrimeVue.
- Production, documentation, and correction of programs according to functional analysis specifications.
- Rapid identification and resolution of anomalies encountered in development or production.
- Reporting and dashboarding with Metabase, and workflow automation using n8n.

Tech stack: JavaScript, Vue.js, .NET (C#), SQL Server, PostgreSQL, DevExpress, PrimeVue, Docker, Metabase, n8n, Crystal Report, Git

Full Stack Developer

Dec. 2022 – Dec. 2023

Infotech Consulting Services (ICS) – Sfax, Tunisia

- Creation of new REST APIs, testing and validation with Postman (backend).
- Development of new backend services to support business functionalities.
- Creation of frontend interfaces and pages to improve user experience.

Tech stack: Laravel, Nuxt.js, Vue.js 3, MySQL, Docker, Postman, JIRA

Developer

Nov. 2021 – Sep. 2022

Logicom – Sfax, Tunisia

- Monitoring and processing of customer claims, development across various ERP modules (sales management, inventory, production, cash register...).
- Testing and verification of developed modules, deployment of Crystal Report forms.

Tech stack: C#, Visual Basic, Crystal Report, SQL, PHP

Intern – Final Year Project

Feb. 2020 – Jul. 2020

Leader Tec Engineering – Sfax, Tunisia

- Development of a stock management application: suppliers, customer orders, products, invoices, and quotes.

Tech stack: PHP, Java, JavaScript, Bootstrap, HTML5, Android Studio
