PROFILE

Full Stack Developer with 4+ years of experience across the .NET / Vue.js stack, plus hands-on mobile development with Flutter and Firebase and a strong, self-driven focus on AI automation and DevOps. Comfortable owning a feature end to end: backend APIs (ASP.NET Core, EF Core, MediatR, SignalR), modern frontends (Vue.js 3, TypeScript, PrimeVue), cross-platform mobile apps (Flutter, Firebase), containerized deployment (Docker, GitHub Actions CI/CD) and workflow/AI automation (n8n, RAG pipelines). Analytical, autonomous and quick to adapt to new business contexts.

PROFESSIONAL EXPERIENCE

Full Stack Developer
Jan. 2024 – Present

APBS Groupe — Sage Management Solutions Integrator — Sfax, Tunisia

- Web development in .NET within the Sage division: design and development of business management applications (sales, inventory, accounting, production) following MVC and MVVM architectures.
- Implementation and integration of an e-invoicing gateway compliant with current regulations, connected to TTN (Tunisia TradeNet) via REST APIs and webhooks.
- Data access layer with Entity Framework Core and real-time features (notifications, live dashboard updates) with SignalR.
- Involved in every stage of the development cycle: functional analysis, architecture, detailed design, programming and testing.
- Design and development of interactive, ergonomic user interfaces with Vue.js and PrimeVue.
- Reporting and dashboards with Metabase; workflow automation with n8n, including webhook-triggered integrations between internal systems and external services.
- Containerized packaging with Docker to standardize and simplify deployments across environments.
- Writing, documenting and fixing programs according to functional specifications; fast identification and resolution of issues.

Tech stack: JavaScript, Vue.js, .NET (C#), ASP.NET MVC/MVVM, Entity Framework Core, SignalR, REST API, SQL Server, PostgreSQL, DevExpress, PrimeVue, Docker, Metabase, n8n, Webhooks, Crystal Report, Git

Full Stack Developer
Dec. 2022 – Dec. 2023

Infotech Consulting Services (ICS) — Sfax, Tunisia

- Created new REST APIs, with testing and validation in Postman.
- Developed new backend services to support business features.
- Built frontend interfaces and pages to improve user experience.

Tech stack: Laravel, Nuxt.js, Vue.js 3, MySQL, Docker, Postman, JIRA

Developer
Nov. 2021 – Sep. 2022

Logicom — Sfax, Tunisia

- Follow-up and handling of customer complaints; development across ERP modules (sales, inventory, production, point of sale).
- Testing and verification of developed modules; deployment of Crystal Report outputs.

Tech stack: C#, Visual Basic, Crystal Report, SQL, PHP

Intern (Final-year project)
Feb. 2020 – Jul. 2020

Leader Tec Engineering — Sfax, Tunisia

- Developed an inventory management application: suppliers, customer orders, products, invoices and quotes.

Tech stack: PHP, Java, JavaScript, Bootstrap, HTML5, Android Studio

SELECTED PROJECTS

ORVATEK Flutter · Firebase · Cloud Functions
Cross-platform maintenance & after-sales app (Android, iOS, web) with customer, technician and admin spaces: live technician tracking on a map, signed quotes, PDF invoices, push notifications, role-based Firestore security rules and 3 languages (AR/FR/EN) with RTL. Live demo: orvatek-sav.web.app

SRTK Web application
Dynamic web application developed for the Sfax Regional Transport Company (SRTK).

KidTrack · TaskFlow · FashionShop Vue.js · Web
Daycare management platform, Kanban board (drag & drop, recurring tasks) and e-commerce store — deployed demos available on my portfolio.

EDUCATION

Master's in Information Systems and Network Development — Nov. 2022 – Dec. 2024
ISET Sfax — Software Engineering and New Technologies — Sfax, Tunisia

Bachelor's Degree in Computer Science — Sep. 2017 – Jun. 2020
ISIMS Sfax — Higher Institute of Computer Science and Multimedia — Sfax, Tunisia

Baccalaureate in Mathematics — Sep. 2012 – Jul. 2017
Lycée Majida Boulila — Sfax, Tunisia

TECHNICAL SKILLS

Backend	C# / .NET 8 · ASP.NET Core · Entity Framework Core · REST API · MediatR · SignalR
Frontend	Vue.js 3 · TypeScript · Vite · Tailwind CSS · PrimeVue · JavaScript · Nuxt.js · React.js · Blazor
Mobile & Cloud	Flutter · Dart · Firebase (Auth, Firestore, Storage, Cloud Functions, FCM) · Riverpod
AI & Automation	n8n · Webhooks · AI Agents · RAG · MCP · OpenAI API · Ollama · LangChain / LangGraph
Cloud & DevOps	Docker · Azure · GitHub Actions · CI/CD · Git
Databases & BaaS	SQL Server · PostgreSQL · Redis · Supabase · MySQL · MongoDB · Firestore
Other languages	PHP, Laravel, Symfony, C, Java, J2EE, Python
ERP & Business	Sage, Odoo, Big Data, Hadoop
Tools & Design	Postman, JIRA, Metabase, Crystal Report, Adobe Illustrator, Adobe Photoshop
Operating systems	Linux (Ubuntu), Windows

AUTOMATION, AI & DEVOPS INITIATIVES

- Self-directed exploration of AI automation: n8n workflows triggered by webhooks, and Retrieval-Augmented Generation (RAG) pipelines combining OpenAI API / Ollama with vector search for internal knowledge assistants.
- Experimentation with the Model Context Protocol (MCP) and LangChain/LangGraph to orchestrate multi-step AI agents connected to business tools and APIs.
- Docker-based CI/CD pipelines with GitHub Actions to automate build, test and deployment.
- Backend-as-a-service prototyping on Firebase (Auth, Firestore, Storage, Cloud Functions) and Supabase (PostgreSQL, Auth, Storage), and evaluation of Redis for caching and queues.
